Fax No: 011-81-466-27-2669

Attention: Mr. Yoichi Azuma

Reference: File E96090 - Project 03SC07528

Subject: Model C15 Series - rated 100-240Vac, 12VA
maximum; 24-48Vdc, 5W maximum and 24Vac, 7VA

Dear Mr. Yoichi Azuma:

NOTICE OF AUTHORIZATION TO APPLY THE UL MARK AND C-UL MARKS

UL's investigation of your product has been completed under project number 03SC07528 and the product was determined to comply with the applicable requirements.

This fax temporarily supplements the UL Follow-Up Services Inspection Procedure and serves as authorization to apply the UL Recognized Marking and/or Recognized Component Mark and the C-UL Recognized Marking and/or Recognized Component Mark only at the factory under UL's Follow-Up Service Program to the above product which is constructed as described below:

Identical to new models, which were submitted to UL for this investigation. The UL records covering the product will be in the Follow-Up Services Inspection Procedure, File E96090, Vol. 1, Sec. 16.

To provide the manufacturer with the intended authorization to use the UL Mark, the addressee must send a copy of this Notice and all attached material to each manufacturing location as currently authorized in File E96090, Vol. 1.

E96090, 03SC07528

August 26, 2003

Page 2

This authorization is effective for 90 days from the date of this Notice and only for products at the indicated manufacturing locations. Records in the Follow-Up Services Procedure covering the product are now being prepared and will be sent to the indicated manufacturing locations in the near future. Please note that the Follow-Up Services Procedures are sent to the manufacturers only unless the Applicant specifically requests this document.

Products which bear the UL Mark shall be identical to those which were evaluated by UL and found to comply with UL's requirements.

Within Canada, there are federal and local statutes and regulations such as the Consumer Packaging and Labeling Act, requiring the use of bilingual product markings on products intended for the Canadian market. It is the responsibility of the manufacturer (or distributor) to comply with this law. The UL Follow-Up Service Procedures will only include the English version of the markings.

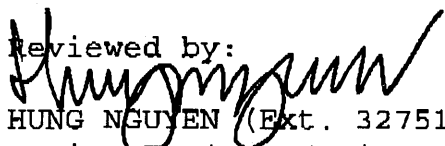

If changes in construction are discovered, authorization to use the UL Mark may be withdrawn and products that bear the UL Mark may have to be revised (in the field or at the manufacturer's facility) to bring them into compliance with UL's requirements.

If EMC is part of your product certification needs, please contact us for information on UL Santa Clara's EMC testing service. Our state of the art facilities and experienced staff can meet the most demanding schedules. You can contact us at sales.scl@us.ul.com.
