

Single Loop Controller SDC25/26

■ Features

The DigitroniK SDC25/26 is a digital indicating controller featuring multi-range inputs and PID control system using new algorithms "RationalLOOP" and "Just-FiTTER".

Up to two control output points (this number of points may vary depending on the model) can be used, which are selectable from the relay contact, voltage pulse, and current.

The smart loader package ensures easy setting operation and monitoring.

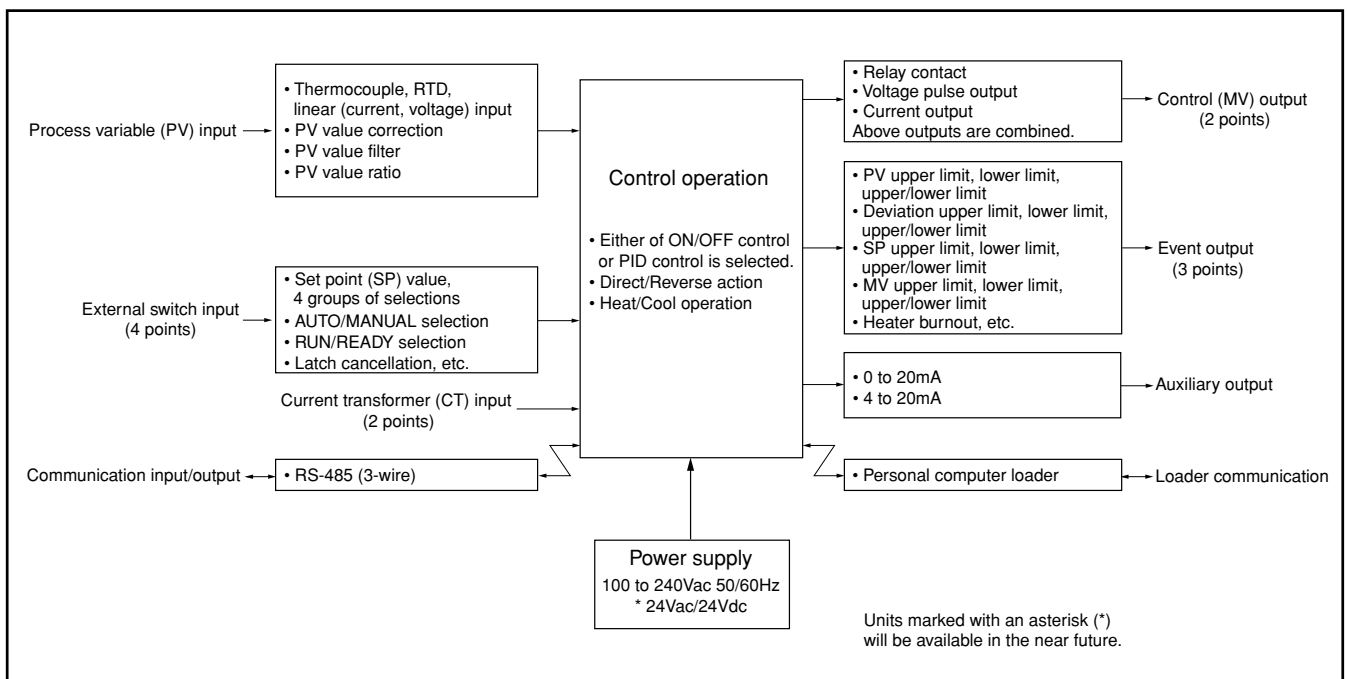

This controller is compliant to the IEC directives and the CE marking.

- Space saving design with a depth of 65mm.
The mask of the front panel is also only 5mm thick.
- High accuracy of $\pm 0.3\%$ FS and sampling cycle of 0.3s (seconds).
- Multi-range inputs are available for selection, where the input type can be freely changed among thermocouple, RTD, current, and voltage.
- The control method can be selected from any of the ON/OFF control and PID control using "RationalLOOP" + "Just-FiTTER".

- The heat/cool control can be achieved using two control output points and event outputs.
- The PC loader port is provided as a standard function.
- The control output types available for selection are relay, voltage pulse, and current outputs. The heat /cool control can be achieved by interfacing with the 2nd control output in combination with these outputs.
- Event 3 points or 2 points (independent contact), CT input 2 points, DI 4 points, and RS-485 can be selected in combination.
- The smart loader package (SLP-C35) can be used.

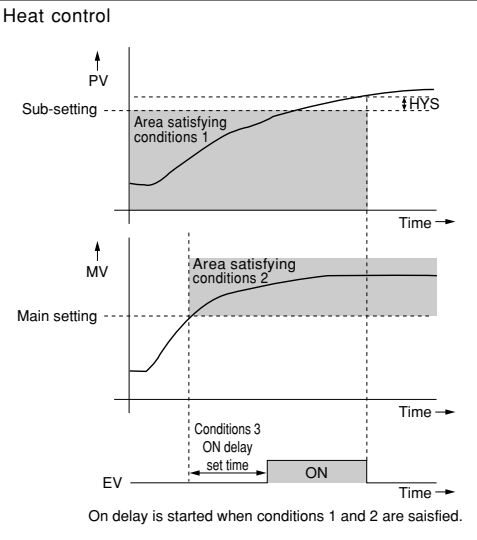

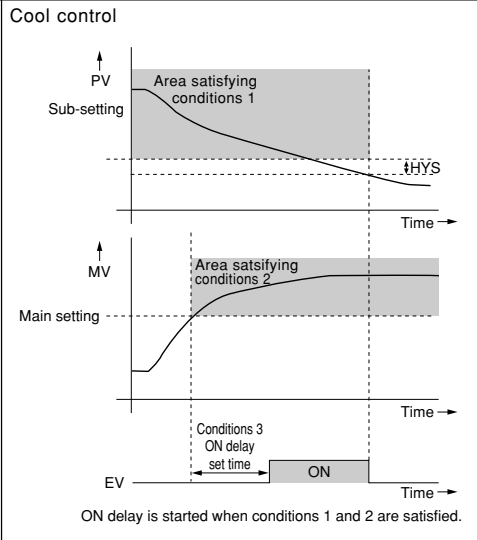

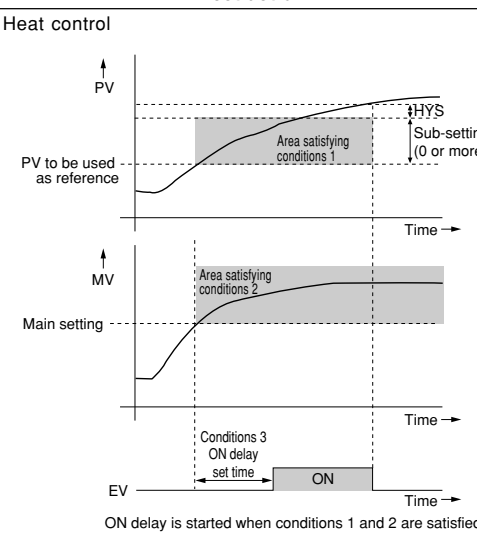

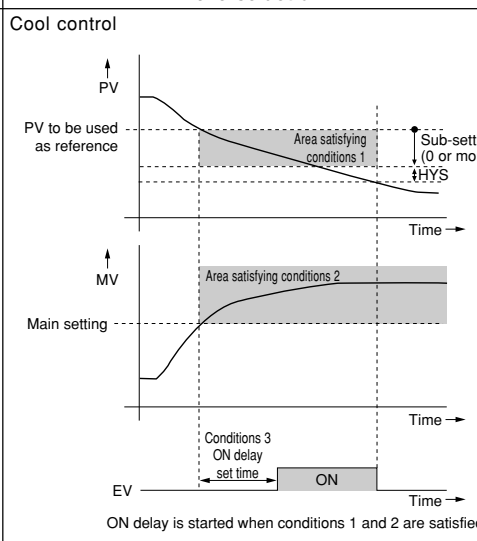

■ Basic Function Block of SDC25/26

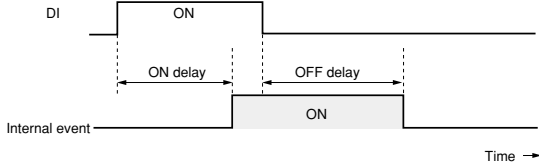

■ Specifications

| | | | | | |
|------------------------------------|---|---|--|--|--|
| PV input | Input type | Multi-range of inputs - thermocouple, RTD, DC current and DC voltage | | | |
| | Input sampling time | 0.3s | | | |
| | Input bias current | Thermocouple input: 0.2μA or less RTD input: 1mA typical DC voltage input: 1V range or less... 1μA or less 0 to 5V, 1 to 5V range... 3.5μA or less 0 to 10V range... 7μA or less | (Note 1) RTD or A-wire burnout: Upscale + AL01 B-wire or C-wire burnout: Upscale + AL01, 03 More than 2-wire burnout: Upscale + AL01 | | |
| | Burnout | Thermocouple input: Upscale + alarm display RTD input: Upscale + alarm display (Note 1) DC voltage input: Upscale + alarm display (However, the burnout cannot be detected for the 0 to 10V range.) DC current input: Upscale + alarm display (However, the burnout cannot be detected for the 0 to 20mA range.) | | | |
| Indications and setting | PV, SP indication method | 4-digit, 7-segment LED (PV: Upper green display, SP: Lower orange display) | | | |
| | Number of setting points | Max. 4 points | | | |
| | Setting range | Lower to higher limit value of the PV range (SP upper/lower limit available) | | | |
| | Multi-status indicator | The control output status, alarm or RUN/READY status is indicated. | | | |
| | Indication accuracy | ±0.3%FS±1 digit In the negative area of the thermocouple, the accuracy is ±0.6%FS±1 digit (at an ambient temperature of 23±2°C.) | | | |
| | Indication range | See Table 1. | | | |
| Control output | Output type | Relay contact | Voltage pulse | Current | |
| | Control action | Time proportional PID | | Continuous PID | |
| | Number of PID groups | Max. 4 groups | Max. 4 groups | Max. 4 groups | |
| | PID auto-tuning | Automatic PID value setting by limit cycle method. However, one of the following 3 control characteristics can be selected: • Standard • Quick disturbance response • Less up/down fluctuations | | | |
| | Output rating | NO side: 250Vac/30Vdc, 3A (resistive load) NC side: 250Vac/30Vdc, 1A (resistive load) Service life: NO side: 50,000 cycles or more NC side: 100,000 cycles or more Min. opening/closing time: 250ms | Open terminal voltage: 19Vdc±15% Internal resistance: 82Ω±0.5% Allowable current: Max. 24mAdc Min. OFF/ON time: When 1s or less: 1ms When 2 to 9s: Cycle time x 1ms When 10s or longer: 250ms | Output type: 0 to 20mAdc or 4 to 20mAdc Allowable load resistance: Max. 600Ω Output accuracy: ±0.3%FS (However, ±1%FS for 0 to 1mA) | |
| | Cycle time (s) | 5 to 120 | 0.1, 0.25, 0.5, 1 to 20 | — | |
| | PID control | Proportional band (%FS) | 0.1 to 999.9 | | |
| | | Integral time (s) | 0 to 9999 | | |
| | | Derivative time (s) | 0 to 9999 | | |
| | | Manual set (%) | -10.0 to +110.0 | | |
| | Just-FITTER | Overshoot suppression coefficient | 0 to 100 | | |
| | ON/OFF control | Operating differential (°C) | 0 to 9999 digit | | |
| | Control operation selection | Direct action or reverse action (However, reverse action only for heat/cool control) | | | |
| | Heat/Cool control selection | Control output and event output, auxiliary output | | | |
| | Auxiliary output | Output type | 0 to 20mAdc or 4 to 20mA | | |
| Load resistance | | Max. 600Ω | | | |
| Output accuracy | | ±0.3%FS (However, ±1 digit for 0 to 1mA) | | | |
| External contact input (DI) | Number of inputs | Max. 4 points | | | |
| | Function | Up to 4 kinds of setting value (SP) selections, PID group selection, RUN/READY selection, AUTO/MANUAL selection, Auto tuning stop/start, Control action Direct/Reverse selection, SP ramp enable/disable, PV value hold, Max. PV value hold, Min. PV value hold, Timer start/stop, All DO latch cancellation | | | |
| | Input rating | Non-voltage contact or open collector | | | |
| | Min. detection holding time | 0.6s or longer | | | |
| | Allowable ON contact resistance | Max. 250Ω | | | |
| | Allowable OFF contact resistance | Min. 100kΩ | | | |
| | Allowable ON-state residual voltage | Max. 1.0V | | | |
| | Open terminal voltage | 5.5Vdc±1V | | | |
| ON terminal current | Approx. 7.5mA (at short-circuit), Approx. 5.0mA (at contact resistance of 250Ω) | | | | |

| | | | | | |
|------------------------------------|---|--------------------------------------|-----------------------|---------------------------------|-----------------------|
| Event | Number of output points | 2 to 3 points (according to a model) | | | |
| | Number of internal event settings | Up to 8 settings | | | |
| | Event type <ul style="list-style-type: none"> ● shows that the ON/OFF is changed at this value. ○ shows that the ON/OFF is changed at a point that "1U" is added to this value. | PV high limit | | PV low limit | |

| | <ul style="list-style-type: none"> ● shows that the ON/OFF is changed at this value. ○ shows that the ON/OFF is changed at a point that "1U" is added to this value. | <p>The direct and reverse action settings are disabled for the timer event. When using the timer event, it is necessary to set the operation type of the DI allocation to "Timer Start/Stop". Additionally, when setting the event channel designation of the DI allocation, multiple timer events are controlled from individual internal contacts (DI).</p> <ul style="list-style-type: none"> ● Setting items <ul style="list-style-type: none"> • ON delay time: A period of time necessary to change the event from OFF to ON after DI has been changed from OFF to ON. • OFF delay time: A period of time necessary to change the event from ON to OFF after DI has been changed from ON to OFF. ● Operation specifications <ul style="list-style-type: none"> • The event is turned ON when DI ON continues for ON delay time or longer. • The event is turned OFF when DI OFF continues for OFF delay time or longer. • In other cases, the current status is continued. <div style="text-align: center; margin: 10px 0;">  </div> <ul style="list-style-type: none"> ● CAUTION <p>When setting the ON delay and OFF delay, it is necessary to put in "Multi-function setup". The default settings of the ON delay and OFF delay before shipment are 0.0s. The default setting of the event channel designation of the DI allocation before shipment is "0". In this case, the timer event start/stop can be set for all internal events from one internal contact (DI). Additionally, as one or more event channel designation is set, the timer event start/stop can be set for one internal event specified by one internal contact (DI). However, when setting the event channel of the DI allocation, it is necessary to put in "Multi-function setup".</p> | | |
| | Operating differential | 0 to 9999 digit | | |
| | Output operation | ON/OFF operation | | |
| | Output type | SPST relay contacts, Common for 3 points/independent contact for 2 points | | |
| | Output rating | 250Vac/30Vdc, 2A (resistive load) | | |
| | Life | 100,000 cycles or more | | |
| | Min. opening and closing specifications | 5V, 10mA (reference value) | | |
| Communication | Communication system | Communication protocol | RS-485 | |
| | | Network | Multidrop. This device is provided with the slave station function. 1 to 31 units max. | |
| | | Data flow | Half-duplex | |
| | | Synchronization method | Start/stop synchronization | |
| | Interface | Transmission system | Balance (differential) type | |
| | | Data line | Bit serial | |
| | | Communication lines | 3 transmit/receive lines | |
| | | Transmission speed | 4800, 9600, 19200, 38400 bps | |
| | | Communication distance | 500m max. | |
| | | Protocol | RS-485 (3-wire type) | |
| | Message characters | Character configuration | 9 to 12 bits/character | |
| | | Data length | 7 or 8 bits | |
| | | Stop bit length | 1 or 2 bits | |
| | | Parity bit | Even parity, odd parity, or non-parity | |
| Loader communication | Communication line | 3-wire | | |
| | Transmission speed | Fixed at 19200 bps | | |
| | Recommended cable | Dedicated cable, 2 m long | | |
| Current transformer input | Number of inputs | 2 points | | |
| | Detection function | Control output is ON.: Detection of heater line break or overcurrent Control output is OFF.: Detection of final control devices short-circuit | | |
| | Input object | Number of current transformer windings: 800 turns QN206A (5.8mm-hole diameter) Optional QN212A (12mm-hole diameter) Optional | | |
| | Measurement current range | 0.4 to 50A | | |
| | Indication accuracy | ±5%FS±1 digit | | |
| | Indication range | 0.0 to 70.0A | | |
| | Indication resolution | 0.1A | | |
| | Output | Selected from control output 1 and control output 2, or event output 1, event output 2, and event output 3. | | |
| | Min. detection time | Burnout detection: Min. control output ON time 0.3s or more Final control device short-circuit detection: Min. control output OFF time 0.3s or more | | |

Table 1 Input Types and Ranges

| Input type | C01 No. | Sensor type | Range | |
|---------------|---------|---------------------|--------------------|-----------------|
| Thermo-couple | 1 | K | -200 to +1200°C | -300 to +2200°F |
| | 2 | K | 0 to 1200°C | 0 to 2200°F |
| | 3 | K | 0 to 800°C | 0 to 1500°F |
| | 4 | K | 0.0 to 600.0°C | 0 to 1100°F |
| | 5 | K | 0.0 to 400.0°C | 0 to 700°F |
| | 6 | K | -200.0 to +400.0°C | -300 to +700°F |
| | 7 | K | -200.0 to +200.0°C | -300 to +400°F |
| | 8 | J | 0 to 1200°C | 0 to 2200°F |
| | 9 | J | 0.0 to 800.0°C | 0 to 1500°F |
| | 10 | J | 0.0 to 600.0°C | 0 to 1100°F |
| | 11 | J | -200.0 to +400.0°C | -300 to +700°F |
| | 12 | E | 0.0 to 800.0°C | 0 to 1500°F |
| | 13 | E | 0.0 to 600.0°C | 0 to 1100°F |
| | 14 | T | -200.0 to +400.0°C | -300 to +700°F |
| | 15 | R | 0 to 1600°C | 0 to 3000°F |
| | 16 | S | 0 to 1600°C | 0 to 3000°F |
| | 17 | B | 0 to 1800°C | 0 to 3300°F |
| | 18 | N | 0 to 1300°C | 0 to 2300°F |
| | 19 | PL II | 0 to 1300°C | 0 to 2300°F |
| | 20 | Wre5-26 | 0 to 1400°C | 0 to 2400°F |
| | 21 | Wre5-26 | 0 to 2300°C | 0 to 4200°F |
| | 22 | Ni-NiMo | 0 to 1300°C | 0 to 2300°F |
| | 23 | PR40-20 | 0 to 1900°C | 0 to 3400°F |
| | 24 | DIN U | -200.0 to +400.0°C | -300 to +700°F |
| | 25 | DIN L | -100.0 to +800.0°C | -150 to +1500°F |
| | 26 | Golden iron chromel | 0.0K to 360.0°K | 0.0 to 360.0°K |

! Handling Precautions

- The accuracy is $\pm 0.3\%FS \pm 1$ digit, and $\pm 0.6\%FS \pm 1$ digit for a negative area of the thermocouple.
- The accuracy varies according to the range.
The accuracy of the No.17 (sensor type B) is $\pm 4.0\%FS$ for a range of 260°C or less, $\pm 0.4\%FS$ for 260 to 800°C.
The accuracy of the No.23 (sensor type PR40-20) is $\pm 2.5\%FS$ for 0 to of 300°C, and $\pm 1.5\%FS$ for 300 to 800°C, $\pm 0.5\%FS$ for 800 to of 1900°C.
The accuracy of the No.26 (sensor type golden iron chromel) is $\pm 1.5K$.
- For ranges with a decimal point, tenths are displayed on the line underneath point.

| Input type | C01 No. | Sensor type | Range | |
|------------|---------|-------------|--------------------|----------------|
| RTD | 41 | Pt100 | -200.0 to +500.0°C | -300 to +900°F |
| | 42 | JPt100 | -200.0 to +500.0°C | -300 to +900°F |
| | 43 | Pt100 | -200.0 to +200.0°C | -300 to +400°F |
| | 44 | JPt100 | -200.0 to +200.0°C | -300 to +400°F |

| | 59 | Pt100 | -10.00 to +60.00°C | -10 to +140°F |
| | 60 | JPt100 | -10.00 to +60.00°C | -10 to +140°F |
| | 61 | Pt100 | 0.0 to 100.0°C | 0 to 200°F |
| | 62 | JPt100 | 0.0 to 100.0°C | 0 to 200°F |
| | 63 | Pt100 | 0.0 to 200.0°C | 0 to 400°F |
| | 64 | JPt100 | 0.0 to 200.0°C | 0 to 400°F |
| | 65 | Pt100 | 0.0 to 300.0°C | 0 to 500°F |
| | 66 | JPt100 | 0.0 to 300.0°C | 0 to 500°F |
| | 67 | Pt100 | 0.0 to 500.0°C | 0 to 900°F |
| | 68 | JPt100 | 0.0 to 500.0°C | 0 to 900°F |

| Input type | C01 No. | Sensor type | Range |
|--------------|---------|-------------|---|
| Linear input | 81 | 0 to 10mV | Scaling in the range of -1999 to +9999 Decimal point position changeable |
| | 82 | 10 to +10mV | |
| | 83 | 0 to 100mV | |
| | 84 | 0 to 1V | |
| | 86 | 1 to 5V | |
| | 87 | 0 to 5V | |
| | 88 | 0 to 10V | |
| | 89 | 0 to 20mA | |
| | 90 | 4 to 20mA | |

■ Model Selection Guide

I II III IV V VI VII VIII Example: C25TR0UA1000

| I | II | III | IV | V | VI | VII | VIII | Specifications | |
|-----------------|----------|----------------|----------|--------------|----------|----------|-----------------------|---|--------------------------------------|
| Basic model No. | Mounting | Control output | PV input | Power supply | Option 1 | Option 2 | Additional processing | | |
| C25 | | | | | | | | Mask size 48mm x 96m | |
| C26 | | | | | | | | Mask size 96mm x 96mm | |
| | T | | | | | | | Panel mounting type | |
| | | | | | | | | Control output 1 | Control output 2 |
| | | R0 | | | | | | Relay contact output | — |
| | | V0 | | | | | | Voltage pulse output (for SSR drive) | — |
| | | VC | | | | | | Voltage pulse output (for SSR drive) | Current output |
| | | VV | | | | | | Voltage pulse output (for SSR drive) | Voltage pulse output (for SSR drive) |
| | | C0 | | | | | | Current output | — |
| | | CC | | | | | | Current output | Current output |
| | | | U | | | | | Universal | |
| | | | | A | | | | AC model (100 to 240Vac) 50/60Hz | |
| | | | | D | | | | DC model (24Vac/dc) (available soon) | |
| | | | | | 1 | | | Event relay output: 3 points | |
| | | | | | 2 | | | Event relay output: 3 points, Auxiliary output (current output) | |
| | | | | (Note 1) | 4 | | | Event relay output: 2 points (independent contact), | |
| | | | | (Note 1) | 5 | | | Event relay output: 2 points (independent contact), Auxiliary output (current output) | |
| | | | | | 0 | | | — | |
| | | | | (Note 2) | 1 | | | Current transformer inputs: 2 points, Digital inputs: 4 points | |
| | | | | (Note 2) | 2 | | | Current transformer inputs: 2 points, Digital inputs: 4 points, RS-485 Communication | |
| | | | | | | 00 | | No additional processing | |
| | | | | | | D0 | | Inspection Certificate provided | |
| | | | | | | Y0 | | Complying with the traceability certification | |

Note 1. Can not be selected for DC model.

Note 2. Current transformer is sold separately.

■ Dimensions

● C25

(Unit: mm)

● C26

! Handling Precautions

To fasten this controller onto the panel, tighten a mounting bracket screws, and turn one more half turn when there is no play between the bracket and panel. Excessively tightening the screws may deform the controller case.

● Panel cutout diagram

● C25

● C26

! Handling Precautions

- When three or more units are gang-mounted horizontally, the maximum allowable ambient temperature is 40°C.
- For water-proof installation, install the attached gasket and then mount the device as a stand-alone device.

Part Names and Functions

- (1) Upper display: Displays PV values (present temperature, etc.) or setup items.
- (2) Lower display: Displays SP values (set temperature, etc.) and other parameter values. When the lower display shows the SP value, the "sp" lamp lights up. When the display shows the manipulated variable (MV), the "out" lamp lights up.

- (3) Mode indicator
 - man: Lights when MANUAL (manual mode).
 - ev1 to ev3: Lights when event relays are ON.
 - ot1, ot2: Lights when the control output is ON.

- (4) Multi-status indicator: In the combination of the lighting condition and the lighting status as a group, the priority 3 groups can be set.

- (5) [mode] key: The operation which has been set beforehand can be done by pushing the key for 1s or more.

- (6) [display] key: Used to change the display contents in the operation display mode. Display is returned from bank setup display to operation display.

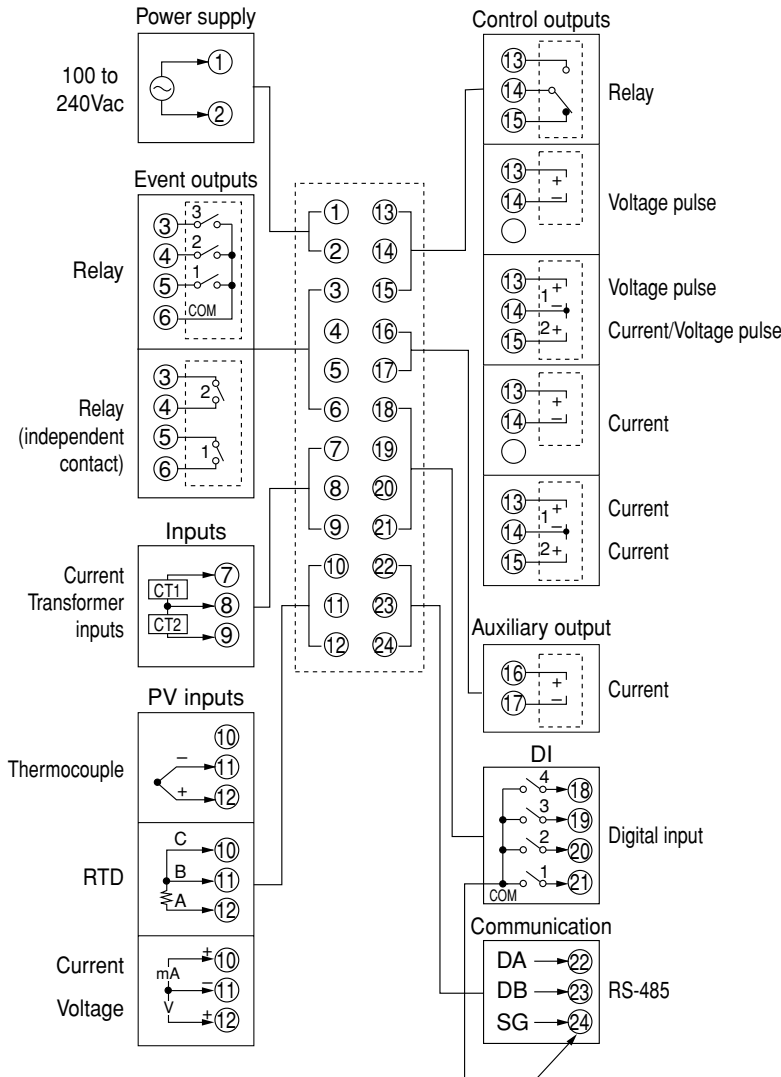

- (7) < , v , ^ key: Used for incrementing numeric values and performing arithmetic shift operations.

- (8) [para] key: Switches the display.

- (9) [enter] keys: Used to set the setup values at the start of change and during the change.

- (10) Loader connector: Connects to a personal computer by using a dedicated cable supplied with the Smart Loader Package.

Connection of C25/26

● **Precautions on the use of self-tuning function**

The final control devices must be powered up simultaneously with or prior to the instrument when the self-tuning function is to be used.

● **Precautions on wiring**

1. Isolation within instrument

Solid line portions " — " are isolated.
Dotted line portions " - - - " are not isolated.

| | | |
|-----------------------------|---------------------|--|
| Power supply | Internal Circuit | Control output 1 |
| PV input | | Control output 2 |
| Current Transformer input 1 | | Auxiliary output |
| Current Transformer input 2 | | |
| Loader communication | | Event output 1 (Note 1) Event output 2 (Note 1) Event output 3 |
| Digital input 1 | | |
| Digital input 2 | | |
| Digital input 3 | | |
| Digital input 4 | | |
| RS-485 Communication | | |

Availability of input and output is based on a model number.
Note 1 In case of independent contact, the part between the event output 1 and the event output 2 is isolated.

2. Preventive measures against noise of instrument power supply

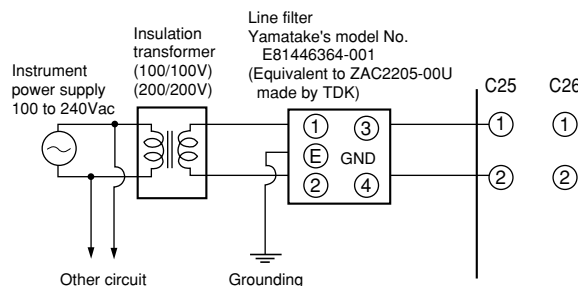

(1) Reduction of noise

Even though the noise is small, the noise filter is used to eliminate the effect of the noise as much as possible.

(2) When noise is excessive

If a large amount of noise exists, appropriate isolation transformer and line filter are used to eliminate the effect of the noise.

3. Installation environment noise sources and preventive measures

Generally, the following may be the noise sources in the installation environment:
Relay and contact, electromagnetic coil, solenoid valve, power supply line (particularly, 100Vac or more), motor commutator, phase angle control SCR, radio communication device, welding machine, high-voltage ignitor, etc.

Preventive measures against fast rise noise

Use of CR filter is effective to prevent fast rise noise.
Recommended filter:
Yamatake's model No. **81446365-001**
(Equivalent to 953M500333311 made by Matsuo Electric.)

4. Wiring precautions

- (1) After taking the noise preventive measures, do not bundle the primary and secondary power cables together or put both power cables in the same conduit or duct.
- (2) Keep the input/output and communication lines 50 cm or more away from the power lines and power supply lines having a voltage of 100Vac or more.
Additionally, do not put these lines together in the same conduit or duct.

5. Inspection after wiring

After the wiring work has been completed, always inspect and check the wiring status. Great care should be taken since incorrect wiring may cause the instrument to malfunction or severe personal injury.

⚠ RESTRICTIONS ON USE

This product has been designed, developed and manufactured for general-purpose application in machinery and equipment. Accordingly, when used in the applications outlined below, special care should be taken to implement a fail-safe and/or redundant design concept as well as a periodic maintenance program.

- Safety devices for plant worker protection
- Start/stop control devices for transportation and material handling machines
- Aeronautical/aerospace machines
- Control devices for nuclear reactors

Never use this product in applications where human safety may be put at risk.

Specifications are subject to change without notice.
