

The Material Composition of Products Relevant for RoHS

1. Product Data

Product name	Model number	Conversion Date & Production Lot	
		Conversion Date	Production Lot
Massflow Sensor	MCS100A104	Jul.2006	0628and later

2. Material Composition Data for the EU RoHS Directive*1

No.	Material / Substance Category	Substance present*2	Threshold level of substance*3
1	Lead / Lead compounds	No	1000ppm
2	Mercury / Mercury compounds	No	1000ppm
3	Cadmium / Cadmium compounds	No	100ppm
4	Hexavalent chromium / Hexavalent chromium compounds	No	1000ppm
5	Polybrominated biphenyls (PBBs)	No	1000ppm
6	Polybrominated diphenylethers (PBDEs)	No	1000ppm

Notes

- *1. EU Directive 2002/95/EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment
- *2. "Yes" indicates that the amount in homogeneous materials is greater than the threshold level.
"No" indicates that the substance is not intentionally added, or that the content in homogeneous materials is less than the threshold level.
- *3. Threshold levels do not apply to the items that are exempted from the RoHS Directive.

3. Special Notes

- A) This document is only valid for the product(s) listed above in section 1, Product Data.
- B) The information herein is dependant upon the documents, information, and data available when the document was created.
