No. 04-A-0125E

Date: March 19, 2005
To: Those listed
Issued by: I. Yuminaga, International Business Department
Subject: RN796A101 Motor Driver Obsolescence Postponement

Purpose: To announce the obsolescence postponement of the RN796A101 motor driver to June 2005

Background: The RN796A101 obsolescence date, which was announced in Bulletin 04-A-0061E as March 31, 2005, has been changed to June 2005 for the following reasons:

- Many user inquiries are expected after March 2005.
- The parts supply obsolescence schedule has some flexibility.

Required actions:

- (1) Notify OEM/end users of the RN796A101 obsolescence, and suggest that they place immediate orders for spare units if required.
- (2) For user inquiries regarding the RN796A101, suggest the following replacement models, depending on the application:

For air conditioning applications: **RN796A0000** (96×96mm size)

For industrial applications: **RN748A0000** (48×96mm size)

Refer to Bulletin 04-A-0120E for the **RN748A0000**.

Obsolescence models:

All models in the RN796A series

RN796A101-1

RN796A101-1-Y99

RN796A301-1

Obsolescence date:

June 30, 2005

Repair service:

Available until March 31, 2010
