

# AT9000 Advanced Transmitter

## Remote-sealed type of Differential Pressure Transmitters

### OVERVIEW

AT9000 Advanced Transmitter is a microprocessor-based smart transmitter that features high performance and excellent stability. Capable of measuring gas, liquid, and vapor, and liquid levels, it transmits 4 to 20 mA DC analog and digital signals according to the measured differential pressure.

It can also execute two-way communications between the CommPad (Handy Communicator) or HART<sup>®</sup> 375 communicator, thus facilitating self-diagnosis, range resetting, and automatic zero adjustment.

### FEATURES

#### **Excellent stability and high performance**

- Long-term stability is proven in 500,000 installations worldwide.
- Unique characterization and composite semiconductor sensors realize excellent temperature and static pressure characteristics.

#### **A diverse lineup**

- A diverse flange lineup, ranging from small diameter 1.5 inch (40 mm) and 2 inches (50 mm) to 3 inches (80 mm), is available to meet user requirements.
- A wide range of models, including those for general purposes, high-temperature, and high temperature and high-vacuum service, is available to meet user requirements. In addition, the working temperature range of regular type has been expanded to 180°C maximum to allow you greater freedom instrumentation.
- A wide variety of corrosion-resistant materials for wetted parts is also available.

#### **Function to correct the temperature of the fill fluid of the capillary section**

Changes in the density of the fill fluid caused by temperature fluctuations are calculated, and the output is corrected accordingly. This function substantially reduces (to 1/5 - 1/10) the effect of seasonal fluctuations in temperature.

#### **Remote communication**

- Two-way communication using digital output facilitates self-diagnosis, range resetting, automatic zero adjustment, and other operations.
- HART<sup>®</sup> protocol communication is available. (Option)

#### **China RoHS**

This device is used in the Oil & Gas, Petrochemical, Chemical, Pulp & Paper, Food & Beverage, Machinery, Steel/Metal & Mining, and Automobile industries and therefore does not fall under the China RoHS Legislation.

If this device is used in semiconductor manufacturing equipment, labeling on the device and documents for the China RoHS may be required. If such documents are required, consult a Yamatake representative.

HART<sup>®</sup> is a registered trademark of the HART Communication Foundation.

**APPLICATION****Petroleum / Petrochemical / Chemical**

- For the measurement of liquid levels including corrosive fluids at high temperatures, and high temperatures under vacuum
- For the control of flow rates as used with tapless venturi tubes
- For replacement of displacement type level gauges
- For materialization of instrumentation without connecting tubes

**Electric power / City gas / Other utilities**

For measurement applications that require high degrees of stability and accuracy.

**Pulp and paper**

- For lines that need transmitters resistant to chemical liquids, corrosive fluids and the like
- For the measurement of liquid levels in small tanks
- Iron and Steel / Nonferrous metal / Ceramics
- For lines that require stable measurement under strictly controlled (temperature, humidity, etc.) conditions

**Iron and steel / Nonferrous metal / Ceramics**

For lines that require stable measurement under strictly controlled (temperature, humidity, vibration, etc.) conditions.

**Machinery / Shipbuilding**

For lines that require stable measurement under strictly controlled (temperature, humidity, etc.) conditions.

**FUNCTIONAL SPECIFICATIONS****Type of protection**

 c. For high temperature and high vacuum

Figure 3 Working pressure temperature of wetted parts section (For high temperature / high temperature and vacuum / high temperature and high vacuum)

**Supply voltage and load resistance**

17.9 to 42V DC. A load resistance of 250 Ω or more is necessary between loops. See Figure 4.

**Figure 4** *Supply voltage vs. load resistance characteristics*

Note) For communication with HART communicator, a load resistance of 250 Ω or more is necessary.

**Output**

Analog output (4 to 20 mA DC) with DE protocol  
 Analog output (4 to 20 mA DC) with HART protocol

**Output signal**

3.6 to 21.6 mA  
 3.8 to 20.5 mA (NAMUR NE43 compliant)

**Failure Alarm**

Upper: 21.6 mA or more  
 Lower: 3.6 mA or less

**Table 1: Ambient temperature limits / Temperature ranges of wetted parts: Flange size: 4 inches (100mm), 3 inches (80mm), 2 inches (50mm), 1.5 inches (40mm)**

		Temperature range (°C) *1 *4				
		Regular type	High-temp. models	High-temp. Vacuum models	High-temp. High Vacuum models	Oxygen and Chlorine models
Wetted parts section	Normal operating range	-40 to 180	-5 to 280 *5	-5 to 280 *5	10 to 300 *5	-10 to 120
	Operative limit range	-50 to 185	-10 to 310 *6	-10 to 310 *6	-10 to 310 *6	-40 to 125
Ambient temperature *2 Flange size: Flush diaphragm type 3 inches (80 mm) Extended diaphragm type 4 inches (100 mm)	Normal operating range	-30 to 75	-5 to 55	-5 to 55	10 to 55	-10 to 75
	Operative limit range	-50 to 80	-10 to 60	-10 to 60	-10 to 60	-40 to 80
Ambient temperature Note 2 Flange size: Flush diaphragm type 2 inches (50 mm) / 1.5 inch (40 mm) Extended diaphragm type 3 inches (80 mm) / 2 inches (50 mm)	Normal operating range	-15 to 65	-5 to 45	-5 to 55	10 to 55	-10 to 75
	Operative limit range	-30 to 80	-10 to 55	-10 to 60	-10 to 60	-40 to 80
Specific gravity of fill liquid *3		0.935	1.07	1.07	1.09	1.87

Note) \*1: See the working pressures and temperatures of the wetted parts section in Figure 1, Figure 2 and Figure 3.

\*2: Ambient temperatures of the transmitter itself

\*3: Approximate values at the temperature of 25°C

\*4: Note that if the operating temperature falls below the lower limit of the normal operating range, the response of the transmitter becomes slower.

\*5: When the wetted parts material is tantalum, the upper limit is 180°C.

\*6: When the wetted parts material is tantalum, the upper limit is 200°C.

**Table 2: Ambient temperature limits / Temperature ranges of wetted parts: Flange size: 3/4inches (20mm), 1/2 inches (15mm)**

		Temperature range (°C) *1 *4			
		Regular type	High-temp. models	Oxygen and chlorine models	Fast response models
Wetted parts section	Normal operating range	-40 to 180	-5 to 280	-10 to 120	-40 to 120
	Operative limit range	-50 to 185	-10 to 310	-40 to 125	-50 to 125
Ambient temperature *2	Normal operating range	-15 to 65	-5 to 45	-10 to 75	-15 to 65
	Operative limit range	-30 to 80	-10 to 55	-40 to 80	-30 to 80
Specific gravity of fill liquid *3		0.935	1.07	1.87	0.873

Note)\*1: See the working pressures and temperatures of the wetted parts section in Figure 1, Figure 2, and Figure 3.

\*2: Ambient temperatures of the transmitter itself.

\*3: Approximate values at the temperature of 25°C.

\*4: Note that if the operating temperature falls below the lower limit of the normal operating range, the response of the transmitter becomes slower.

**For Explosion proof models with digital indicators, which have to be used within the following ranges**

**Normal operating condition**

-20 to 70°C

**Operative limit**

-30 to 80°C

**Figure 5** Ambient temperature and temperature of wetted parts section (for general purpose models)

[Flange diameter: Flush diaphragm 2 inches (50 mm) / 1.5 inch (40 mm)  
Extended diaphragm 3 inches (80 mm) / 2 inches (50 mm)]

Note) When the fill liquid is for general purposes, make sure before using your transmitter that the conditions in both Figure 1, Figure 5 and Figure 6 are met.

**Figure 6** Ambient temperature and temperature of wetted parts section (for general purpose models)

**Figure 8** Ambient temperature and temperature of wetted parts section (for high temperature and vacuum 4, 5 m)

[Flange diameter: Flush diaphragm 2 inches (50 mm) / 1.5 inch (40 mm)]

**Figure 9** Ambient temperature and temperature of wetted parts section (for high temperature and high vacuum 2, 3 m)

[Flange diameter: Flush diaphragm 2 inches (50 mm) / 1.5 inch (40 mm)]

**Figure 10** Ambient temperature and temperature of wetted parts section (for high temperature and high vacuum 4, 5 m)

[Flange diameter: Flush diaphragm 2 inches (50 mm) / 1.5 inch (40 mm)]

**Ambient humidity limits**

5 to 100% RH

**Stability against supply voltage change**

± 0.005% FS/V

**Dead time**

Max: 0.4 sec.

**Damping time**

Selectable from 0 to 32 sec. in ten stages

**Correcting temperature of the capillary section fill fluid**

Changes in the density of the fill fluid ( $\rho$ ) caused by temperature fluctuations are calculated, and the output is cor-

rected accordingly. This function substantially reduces the effect of seasonal fluctuations in temperature.

### How to set this function

Set the inter-flange height L (m) according to the SFC. If the height L (m) is already known, let us know, so, this function can be set before shipment.

If the high pressure side (HP) of your transmitter is located under the tank, place a minus (-) sign before the height L setting.

### Lightning protection

Applicable Standards; IEC 61000-4-5

Peak value of current surge(80/20 $\mu$  sec.): 6000A

### Indicator

The digital LCD indicator (optional) indicates engineering units and can be set freely between -99999 and 99999 (5 digits). For meter calibration, specify the following items when placing your order

- Meter calibration range
- Meter calibration unit
- Linear / Square-root for meter indication.

Various kinds of data can be set using the CommPad or the HART<sup>®</sup>375 communicator.

### Bolts and nuts materials (for fastening meter body cover)

Carbon steel (SNB7), 304 SST, 630 SST

### Paint

#### Standard

Corrosion-resistant paint (Baked acrylic paint)

#### Corrosion-proof finish

Corrosion-proof paint (Baked epoxy paint), fungus-proof finish

#### Corrosion-resistant finish (silver paint)

Transmitter case is coated with silver paint in addition to the above corrosion-resistant finish.

## OPTIONAL SPECIFICATIONS

### FEP protective film

Use FEP protective films when corrosive fluids are used or to inhibition migration from metal diaphragms.

#### Working temperature range

0 to 110°C

#### Working pressure range

Atmospheric pressure to flange rating  
(up to JIS10K, ANSI / JPI 150)  
(Not usable under negative pressure)

### Oil free finish

The transmitter is shipped with oil-free wetted parts.

### External zero/span adjustment function

The transmitter can be easily zero/span adjusted in the field.

### Elbow

This is an adaptor for changing the electrical conduit connection port from the horizontal to the vertical direction, if required by wiring conditions in the field. One or two elbows may be used as needed.

### Conformance to SI units

We deliver transmitters set to any SI units as specified.

### Safety Transmitter

Select this option to be used as a component of Safety Instrumented System (SIS).

AT9000 is complied with IEC61508, certified according to Safety Integrity Level2 (SIL-2)

### Alarm Output (contact output)

Contact output is prepared as alarm output when alarm (Output Alarm/Sensor Temp. Alarm) condition is detected. It can be set to Normally Open. (When alarm is detected, Contact ON).

### Custom calibration

Calibrate for the specified pressure range at the factory.

## PHYSICAL SPECIFICATIONS

### Materials

#### Fill fluid

Silicone oil for general purpose and high-temperature vacuum models

Fluorine oil for oxygen and chlorine models

For specific gravity, refer to page 5.

#### Center body

316 SST

#### Transmitter case

Aluminum alloy

#### Meter body cover

SCS14A (316L SST for diaphragm only)

ASTM B575 (Hastelloy C-276 equivalent), Tantalum, 316L SST

#### For wetted parts

SCS14A (316L SST for diaphragm only)

ASTM B575 (Hastelloy C-276 equivalent), Tantalum, 316L SST

#### Flange materials

304 SST, 316 SST, 316L SST

### Capillary section

#### Capillary tube length

2, 3, 4, 5, 6, 7, 8, 9 and 10 m

2, 3, 4 and 5 m when flange diameter is flush diaphragm

2 inches (50 mm) / 1.5 inch (40 mm)

3/4 inches (20 mm), 1/2 inches (15mm)

extended diaphragm

3 inches (80 mm) / 2 inches (50 mm)

**Capillary tube material**

316 SST

**Armored tube material**

304 SST

**Coating (optional)**

Olefin coating to improve corrosion resistance  
(Not applicable for high-temperature / Vacuum service type and High-temperature / High-vacuum service type.)

**Weight**

Approx. 20.0 kg  
(Including ANSI 150# - 3 inches flange and capillary 5 m long)

**INSTALLATION**

**Electrical connection**

1/2NPT internal thread, M20 internal thread.

**Grounding**

Resistance 100 Ω max.

**Mounting**

Direct mounting on the process side  
Using 2-inch pipe mounting brackets: Mount the transmitter on a horizontal or vertical 2-inch pipe.

**Bracket**

Carbon steel, 304 SST

**U-bolt and nuts**

304 SST

**Process connection**

Flange (both higher and lower pressure sides)

**Flush diaphragm**

ANSI 150, 300 and 600: 3 / 2 / 1.5 inches (RF) equivalents  
ANSI 150, 300: 3/4, 1/2 inches (RF) equivalents

**Extended diaphragm**

ANSI 150 and 300: 4 / 3 / 2 inches (RF) equivalents

**Mounting notes**

- 1) If the fluid to be measured contains hydrogen, please consult us.
- 2) When mounting the transmitter, leave a space of at least 10 cm under the lower nozzle of the tank. If no space is available, please consult us.

<b>WARNING</b>
<ul style="list-style-type: none"> <li>Impact to transmitter can damage sensor module.</li> </ul>

**PERFORMANCE SPECIFICATIONS**

**Max working pressure**

- Note 1. Max. working pressure depends on flange rating, flange materials and operating temperature. Please refer to the following data. Operating range of temperature depends on specification of transmitters.  
 2. Max. working pressure depends on the smaller value of either 1.5 MPa or following data.  
 3. Max. working pressure depends on the smaller value of either 10 MPa or following data.

	JIS	JPI/ANSI
<b>304 SST</b>	<p>The graph shows the maximum working pressure in MPa on the y-axis (0.0 to 12.0) against temperature in °C on the x-axis (-50 to 300).  \*6 Select this code when flange type code "5" or "6" is selected in the transmitter selection.  
 \*7 304 SST Bolt/nut material should be selected.

**DIMENSION**

**Model GTX35R / GTX40R**

(Unit : mm)

- Note)
1. To prevent vibration, you are recommended to fasten the capillary tube mid-length.
  2. Select a gasket that will not contact the diaphragm after it is tightened.
  3. When the suppression is larger than one half of the measuring span, the higher pressure side and the lower pressure side of the process connection end flange are opposite to those shown in the figure above. When using the transmitter to measure liquid levels, connect at H and L marks on the meter body as shown in the right figure.
