

## Technip deploys a new Procurement Website

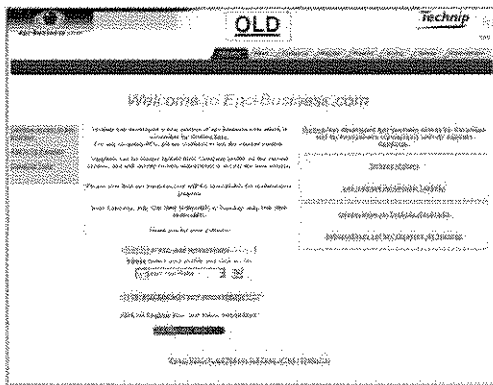

Dear user of EPC-Business,

on mid-April 2008, Technip has made available on line an entirely new version of its Procurement Website EPC-Business. This new version provides greatly improved ergonomics and functionality.

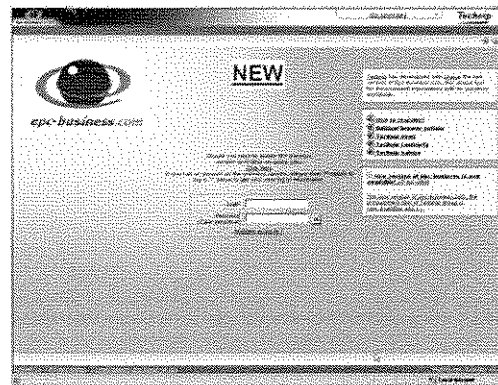

During a short transition period, both the old and the new versions are available on line in parallel:

- the old one, to be used exclusively to complete the work started earlier with it,
- the new one, to process all new inquiries from now on.

This transition period will end-up on July 31<sup>st</sup>, 2008, and the old version will be phased out. Then, only the new version will be available on line, and the URL of the old version will give access automatically to it.

### **Important notice:**

In order to ensure continuity of service for you, your personal account has been copied into the new version. Your login-name is unchanged, however you will have to request a new password. To do so, you must click on the link "Problem to log in?" displayed in the login box, then enter your e-mail address and click on "Send". An e-mail will be sent to this address with your login-name and your new password.

Your company information, currently available in the old version from the pages "Company Structuring", "Business Profile", "Technical Information", and "References Information", has been copied as well into the new version, and will be available to you at "Companies/Suppliers", in the orange tabs bar. We take this opportunity to invite you to check and to update your company information on the new version.

Concerning the inquiries in which you have been invited in the past, only general data have been migrated into the new version. Should you want to retrieve details about these inquiries before the old version is phased out, we invite you to log on to the old version with your old account **between July 16<sup>th</sup> and July 31<sup>st</sup>, 2008 (\*)**, and to print or download any information that you want to keep. As Technip has archived all the data managed in the old version, your data will remain available later, but only upon specific request to our Webmasters at [webmaster@epc-business.com](mailto:webmaster@epc-business.com).

Best Regards,

EPC-Business Administration Team  
[webmaster@epc-business.com](mailto:webmaster@epc-business.com)

(\*) The old version will be exceptionally stopped from July 12<sup>th</sup> to July 15<sup>th</sup> for maintenance related to this migration.
